Objective: To develop a broad-based musculoskeletal outpatient practice with a reputation for excellence in aggressive management and rehabilitation of sports and work related injuries.

Experience *Florida Orthopaedic Institute* 12/97 to date
13020 Telecom Prkwy N., Temple Terrace, FL. 33637

Responsibilities include working in conjunction with 30 specializing surgeons to provide a tailored rehab program for post operative patients. To perform electrodiagnostic testing, joint injections, and epidural injections for the patients, as well as following those suffering difficult to diagnose pain with a determined inoperable condition. Extensive experience with complicated workers compensation cases, help expedite testing and appointments for disability determinations and independent medical evaluations.

Watson Clinic 12/96 to 9/97
1600 Lakeland Hills Blvd, Glenn Barden, MD. 33805

Responsibilities in a 190 physician, 60 year old multi-specialty clinic included the treatment of:

Injured workers with back pain, tendonitis, sprains/strains, arthritis, nerve entrapments, repetitive motion injuries, fibromyalgia, chronic pain, orthotics/prosthetics.

Older patients with spinal stenosis, degenerative disc disease, rotator cuff pathology, degenerative and rheumatoid arthritis, cerebrovascular accident, peripheral nerve pathology, facet arthropathy.

50-80 outpatients seen weekly:

5-10 patients seen in subacute rehabilitation facilities

5-10 electrodiagnostic studies

5-12 epidural steroid injections

5-10 joint injections

3-10 independent medical evaluations

Inpatient consultations at Lakeland Regional Medical Center, a Level I trauma Center

Florida Knee & Orthopedic Centers 1/94 to 7/96
3901 66th St N., St. Petersburg, FL. 33709

Responsibilities at an outpatient musculoskeletal clinic include basically the same responsibilities previously listed with the exception of subacute consults.

Extensive experience was obtained in managing post op joint replacements and proper handling of difficult workers' compensation cases involving litigation.

Carle Clinic 7/93 to 1/94
Champaign, Illinois. 61820

Responsibilities included management of a 15 bed inpatient rehab unit with one other Physiatrist, in a 350 bed acute care hospital serving a population base of 250,000.

Extensive experience was obtained in the Management of:

spinal cord injuries

traumatic brain injuries

post-operative joint replacements
cerebrovascular accidents
cancer and pulmonary rehab
in hospital consultations

Outpatient services provided included:

Management of chronic pain patients
